

CARBON-RELATED CONFERENCES

TOP 2024 EVENTS

CANUSAEPCCOM

SUMMARY

In the rapidly evolving landscape of sustainability and carbon reduction, staying ahead of the curve is crucial. CANUSA EPC has curated a list of 2024 carbon-related events, conferences, and tradeshows across Canada & the USA.

Each event has been selected for its networking opportunities, panels of leading experts, and discovering cutting-edge solutions. Whether you're a seasoned professional or just beginning your journey in the field of carbon reduction, this e-book will help you determine which event(s) you may want to attend this year. Download now and let the team at CANUSA EPC know which ones you're attending!

HIGHLIGHTS

- 13 events across Canada & USA

SPE | AAPG | SEG - CCUS Event

DATE: March 11 - 13, 2024

LOCATION: Houston

HELD: George R. Brown Convention Center

WEB: <https://ccusevent.org/2024>

AGENDA: <https://ccusevent.org/2024/Program/Technical-Program>

CCUS 2024 in Houston highlights current CCUS work and address related challenges, including: Subsurface Geologic Storage and Site Selection, CO₂ Enhanced Hydrocarbon Recovery and Utilization, Reservoir Modeling Monitoring and Risk Assessment, Case Studies, Industry Applications, Economics, Incentives, and Policy, Infrastructure, ESGs and Stakeholder Engagement, Machine Learning and Data Analytics Applications and more.

Decarb Connect North America

DATE: March 26 - 28, 2024

LOCATION: Houston

HELD AT: Westin Houston Memorial City

WEB: <https://decarbconnectnorthamerica.com/>

AGENDA: <https://decarbconnectnorthamerica.com/home/2024-agenda/>

Mitigate risk by learning from relevant case studies. Meet future partners with technology experience and who are already working with other industrials – a great way to speed up the right deployments. Enhance your collaboration opportunities – you'll rub shoulders with people as focused on decarbonization as you (all of you determined to maintain your competitive position at the same time). Get ahead with vital insights into the latest trends and innovations – unmissable intel that will improve decision making and deployments.

Decarbonisation Summit

DATE: April 8 - 11, 2024

LOCATION: New Jersey

HELD AT: Westin Jersey City Newport

WEB: <https://gasworldconferences.com/conference/decarbonisation-summit-2024/>

AGENDA: <https://gasworldconferences.com/conference/decarbonisation-summit-2024/#agenda>

Held in New York against the backdrop of the progressive US Inflation Reduction Act (IRA) and with the world's gaze watching on. If you're a cryogenic equipment expert, a leader in LNG distribution or a pioneer in pumps and valves, this is the event for you. If you're a catalyst in carbon capture, a forerunner in fuel cells or a groundbreaker in green hydrogen, then this is the platform for your calls to action. If you're erudite in e-fuels and circular economies, this is the stage for your company's messaging.

CHAMELEON EVENTS

The North America CCUS & Hydrogen Decarbonisation Summit

DATE: April 16 - 17, 2024

LOCATION: Chicago

WEB & AGENDA: <https://chameleonevents.co.uk/events/the-north-america-ccus-hydrogen-decarbonisation-summit/>

The North America CCUS & Hydrogen Decarbonisation Summit will assess and review the opportunities within the North American Energy Sector and review the different hydrogen road maps set out by different states. We will review the new IRA act of the USA government providing a tax credit of up to \$180 per ton for burying carbon dioxide produced by industrial activity as well as the opportunity to be one of the biggest producers and exporters of hydrogen. The summit will bring together 300+ government officials, regulators, key industry stake holders, leading academia, and service companies.

Carbon Capture Summit 2024

DATE: May 5 - 6, 2024

LOCATION: Calgary

WEB: <https://canada.carbon-capture-conference.com>

AGENDA: <https://canada.carbon-capture-conference.com/access/program> (*need to enter email address for access)

The Carbon Capture 2024 Exhibition & Conference is the only event to deliver leading market intelligence and presentations on the latest carbon capture, utilization, and storage projects across the industry.

Key topics on this year's agenda include: Making an economic assessment for carbon capture, utilization, and storage; Reducing carbon emissions by industry sector – Challenges and Opportunities; New CCUS technologies and engineering know-how in developing the infrastructure; Supporting the industry with upcoming regulations and new environmental policies; Building a business model for CCUS with cost-reduction and commercialization; Latest projects and transportation networks for CO2 storage and utilization

Transformation in Energy

DATE: May 13 - 16, 2024

LOCATION: Calgary

HELD AT: Hotel Arts

WEB: <https://www.oilandgasiq.com/events-transformationinenergy>

AGENDA: <https://www.oilandgasiq.com/events-transformationinenergy/agenda-mc> (*need to enter email address for access)

Enterprises must adapt to rising energy demands, address net-zero regulations and targets, and integrate comprehensive digital strategies to leverage innovative technologies across the business, all while maintaining day-to-day operations and minimizing disruption. This year's Transformation in Energy Summit will provide you with key insights and tools for navigating the complexities of transformation without compromising operational performance. Bringing over 200 senior level executives to discuss how to navigate the transformation of your organization's culture, processes, and technology effectively, all while accelerating sustainability and maintaining your competitive advantage.

Global Energy Show

DATE: June 11 - 13, 2024

LOCATION: Calgary

HELD AT: BMO Centre at Stampede Park

WEB: <https://www.globalenergyshow.com/conference/2024-global-energy-strategic-conference/>

TECHNICAL AGENDA: <https://www.globalenergyshow.com/conference/2024-global-energy-technical-conference/2024-technical-program/>

The Global Energy Show Canada is the largest B2B exhibition and conference engaging with industry buyers and sellers, stakeholders and partners, CEOs and young professionals together to share knowledge and fuel innovation in the ever-changing energy landscape. The technical agenda includes sessions such as: “De-risking CO₂ Storage Projects”, “Integrated Carbon Capture & Storage Monitoring and the Role of Effective Communication”, “Nanoparticle Foam Technology for CO₂ Enhanced Oil Recovery & Storage”, and more.

Carbon Capture Technology Conference & Expo (CCUS Expo) North America 2024

DATE: June 26 - 27, 2024

LOCATION: Houston

HELD AT: NRG Center

WEB: <https://www.ccus-expo.com/>

AGENDA: <https://www.ccus-expo.com/conference-speakers>

Carbon Capture Technology Expo is dedicated to discussing the increasing role that Carbon Capture, Utilization & Storage (CCUS) will play in transition to a net-zero carbon economy. Leading experts from around the world will discuss the latest advances in new technology for carbon capture, storage and transport, as well as unique ways of utilizing CO₂ to produce net-zero fuels and for other manufacturing processes. 400 Exhibitors. 200+ Speakers. 5 Conference Tracks.

Carbon Expo Canada

DATE: Sept 10 - 12, 2024

LOCATION: Edmonton

HELD AT: Edmonton Convention Centre

WEB: <https://www.carbonexpocanada.com/>

KNOWLEDGE BAR: <https://www.carbonexpocanada.com/knowledge-bars/knowledge-bar-program/>

As carbon capture, utilization and storage becomes more prevalent, some advocates question whether it amounts to another way to prop up the oil and gas industry. Others argue it's the only way forward to a net-zero future. Lets dive into a discussion at the Carbon Capture Canada Conference. Meet key industry players over three days of the convention, with a two-day business conference, expanded tradeshow floor with all major players, followed by an unmissable opportunity to take a tour across actual CCUS projects and explore them in-person.

Decarbonizing Oil & Gas Week

DATE: Sept 16 - 20, 2024

LOCATION: Houston

WEB: <https://www.industrialdecarbonizationnetwork.com/events-decarbonizing-oil-and-gas>

The oil and gas industry has a significant role to play both in energy delivery today and in enabling the energy transition for tomorrow. Industry leaders need to build an actionable decarbonization road map that links decarbonization to strategy, identifies where efficiency gains can be made, factors emissions reduction into operational planning and builds a culture focused on decarbonization for the future.

CO2 Summit Nashville

DATE: Sept 17 - 19, 2024

LOCATION: Nashville

WEB: <https://gasworldconferences.com/conference/north-american-co2-summit-2024/>

There are lessons to be learned in decarbonisation policy and process; technology innovation to be realised; and paramount to all of this is the absolute necessity in product purity and safety. Learn all about: The balancing act of sourcing, pricing and crisis management in 2024; Managing unintended consequences in CO2 and decarbonisation; The new CO2 lifecycle through to 2030 and beyond; Insightful strategies to ensure

DATE: TBD, 2024

Canada's Leading Industrial Decarbonisation event: Unlocking Policy, Financing & Partnerships to Scale Industrial Decarbonisation
More event information to be released at a later date.

Pro Networking Tip

Create a personalized QR code to instantly share your contact information:

1. Open a QR Code Creator like QR-Code Monkey and select 'VCard'
<https://www.qrcode-monkey.com/#vcard>
2. Enter the personal and work details you want to include
3. Click "Create QR Code"
4. Click "Download PNG"
5. Save the QR Code you just produced to your mobile phone "Photos"

OPTION A

Save this photo as a 'favorite' for easy access

OPTION B

- Open the QR Code in your photos and take a screenshot
- Save the screenshot as your phone's lock screen

Connect with the team at CANUSA EPC if you plan to attend any events, or would like YOUR carbon-related event to be featured in this e-book.
